

● A TREASURER'S AUDIT

The Meeting Roster, *read sideways.*

A 17-slide distillation of the meeting roster tutorial — focused on the Treasurer's primary number, the four-phase lifecycle, and the moments where the ledger needs a steady hand.

● WHAT IT IS

A roster is not a guest list. A roster is an *attendance ledger*.

Each row ties a person to a ticket type, an amount, and a check-in moment — the four pieces of data that, together, answer the only question the Treasurer asks at 9:01 PM: **how much money came in the door tonight, and from whom?**

The roster is the source of truth for who was in the room and who paid what.

§01 • THREE GROUPS

Who ends up on the roster

- 01 **Self-registered members.**

Booked a role. Added by the system. You don't touch.
- 02 **Walk-up members.**

Add manually through the Add Entry form. Choose ticket, amount auto-computes.
- 03 **Guests.**

Always added manually — guests don't have accounts.

*"As Treasurer, you are the primary owner of the roster's **financial side** — ticket types, amounts collected, exports for the club's books."*

● THREE HANDS ON THE LEDGER

TREASURER	Owns the financial side: ticket types, amounts, exports, reconciliation.
SAA	Owns the operational side: registering walk-ins, marking check-ins, watching the live count.
VPE	Owns the structural side: meeting lifecycle, role assignments, publishing.

The roster is editable at every stage from Pre-meeting through Live meeting. Once the meeting is Finished, edits require ClubAdmin intervention.

PHASE ONE

The ledger, *before* the door opens.

Most of the roster's value is data that has already been entered before the meeting. By the time the doors open, you should know roughly how many people are coming, what the expected revenue is, and which members have already self-registered for roles.

WINDOW • T-7 DAYS THROUGH T-1 DAY

ROSTER • SHANGHAI LEADERSHIP • NO. 868941

LIVE

A

Meeting selector

Pick the meeting • dropdown lists only this club's meetings

B

KPI panel

Three live numbers • attendees, total amount, checked-in

C

Roster table

Name • ticket • amount • check-in • roles • editable cells

D

Add Entry form

Walk-in & guest quick-add • needs Roster Edit permission

- A

The dropdown

 lists only this club's meetings. Pick the one you're working on.

B

Three numbers

 — attendees, total amount, checked-in. Live updates as people register and arrive.

C

The table

 is editable cell-by-cell. Click to change ticket, amount, or check-in.

D

Add Entry

 is your tool for walk-ins. Hidden if you lack *Roster Edit*.

Nº	TICKET	PRICE	WHEN TO USE
01	Member • Early-bird Paid before 15:00 • lower rate	¥20.00	Members who paid before the 15:00 cutoff on the meeting day.
02	Member • Walk-in Paid at the door • full price	¥25.00	Members who pay at the door — i.e. after 15:00 on the meeting day.
03	Guest • Early-bird Paid before 15:00 • guest rate	¥40.00	Guests who paid before the 15:00 cutoff on the meeting day.
04	Guest • Walk-in Paid at the door • full guest rate	¥50.00	Guests who pay at the door — i.e. after 15:00 on the meeting day.
05	Officer Free • ExComM only	¥0.00	Current ExComM members. Add manually — the system cannot tell who is currently an officer.

The 15:00 cutoff is firm. Anyone whose payment hasn't landed in the Treasurer's record by 15:00 on meeting day is automatically a Walk-in.

II

PHASE TWO

The room fills. *The number climbs.*

The room is filling up. Members and guests are walking in. Your job is to register everyone who arrives, so the Treasurer's records are accurate.

WINDOW • 6:30 PM THROUGH 7:15 PM

*"The QR is for **members who already have a roster entry**. Guests still need you to add them manually."*

- 1 Click **Self Check-In** on the Roster page (top-right) to reveal the QR.
- 2 Project it on the TV, print a tent card, or paste the URL in WeChat.
- 3 Members scan → their check-in is recorded automatically.
- 4 Guests and unbooked walk-ins still go through the Add Entry form.

ATTENDEES 38 rows on the roster	TOTAL AMOUNT ¥1,420 your primary number TREASURER	CHECKED-IN 12 scanned the QR or marked
--	---	---

Cross-check the running total against the cash in your envelope every 30 minutes. If the envelope has ¥200 more than the panel shows, someone paid cash and wasn't added to the roster — find them on the floor and add their row.

PHASE THREE

Keep the ledger *honest.*

*During the meeting, the roster is mostly read-only.
Your job is to keep it accurate as people come and go —
late arrivals, role swaps, the occasional soft-cancel
when someone really isn't showing up.*

WINDOW • 7:00 PM THROUGH 9:00 PM

■ SOFT CANCEL • DEFAULT

Mark the row *cancelled*.

The entry stays in the database but is marked *Cancelled*. The ticket is released, but the row is still visible in the table — greyed out, but visible.

- Preserves the audit trail
- Reversible via **Restore**
- Use for most cases

Reversible • click Restore on the greyed row.

■ HARD DELETE • ADVANCED

Remove the row *entirely*.

The row is removed and any role booking they had is released back to the pool. Use this only for duplicates, wrong-meeting mistakes, or urgent role-slot release.

- Permanent for that meeting
- Cannot be undone from the UI
- Ticket payment survives in the Tickets table

Permanent • always prefer soft cancel unless the entry is bogus.

IV

PHASE FOUR

Seal the ledger. *Hand it to the room.*

The General Evaluator is wrapping up. Time to seal the roster. Export the PDF, soft-cancel no-shows before reconciliation.

WINDOW • 9:00 PM THROUGH END OF MEETING

01 • DEFAULT

TREASURER'S PRIMARY

PDF

The binder.

Printable, signed, and filed. Includes every non-cancelled entry with ticket type, amount, and check-in status. This is the document that goes into your binder as the meeting's financial record.

2026-06-24-meeting-247-roster.pdf

02 • RECONCILIATION

CSV

The spreadsheet.

For importing into a spreadsheet when you do the month-end reconciliation against the bank statement. Pairs with the Tickets page, the payment ledger.

2026-06-24-meeting-247-roster.csv

03 • COMMS

PNG

The recap.

For the post-meeting recap in the club's WeChat group. Quick snapshot of who was there, totals at the top.

2026-06-24-meeting-247-roster.png

N°	ACTION	PERMISSION NEEDED	TYPICAL ROLES
01	View the roster for a meeting	Roster View	<i>Member and above</i>
02	Add / edit / cancel entries	Roster Edit	<i>Officer and above</i>
03	Hard-delete an entry	Roster Edit + Meeting Manage	<i>VPE / ClubAdmin</i>
04	Override a Finished meeting's roster	ClubAdmin override	<i>ClubAdmin only</i>

Sharing-master override: *If you are the meeting's sharing master, Memory Maker automatically grants you Roster Edit and Roster View for that meeting, even if your normal role doesn't include them. Common trouble cases — hidden Add Entry form, greyed QR, hard-deleted by mistake — are covered in the source tutorial.*

Count every row. *Reconcile every ¥.*

The roster is your ledger. Treat it like one — keep the rows honest, the totals reconciled, and the export in the binder before you turn the lights out. The audit trail outlives every meeting.
